

After School Clubs

2023 - 2024

Robotics Club

Dive into the future of technology by building and programming your own robots. Develop engineering skills while having fun with hands-on projects that spark curiosity and innovation. This class will also program drones. We are proud to offer beginner, intermediate, and advanced level robotics!

Tae Kwon Do

Immerse yourself in the ancient art of Tae Kwon Do, where discipline, self-defense, and physical fitness. Learn striking techniques, forms, and valuable self-defense skills in a dynamic and supportive environment. Develop not only your physical strength but also your mental focus and resilience as you progress through martial arts!

Video Game Design

Transform your gaming passion into game creation. Learn the art of designing and coding video games, where your creativity knows no bounds. Learn how to create a video game at all levels by combining your creativity with technological skillsets.

Coding

Discover the language of the future by delving into coding. Learn how to build websites, apps, and more while developing problem-solving skills that will set you up for success in the digital age. This small group program tailors projects to the kids' individual interests and goals.

Music Lessons

Unlock your musical potential with expert-led lessons in various instruments or vocal training. Discover the joy of creating harmonious melodies and expressing yourself through music. Guitar, drums, vocals, piano, and more are all offered by experienced music professionals. Open band rehearsal offered as well!

Chess Club

Hone your strategies and dynamic thinking while improving decision making through the game of chess. Our friendly competitions and group camaraderie unite students across all skill levels with the goal of improving not only chess skills but also social progress and friendship development.

Teen Talk

Join open discussions about various topics in a safe and supportive environment. Connect with peers, share experiences, and engage in meaningful conversations with assistance from our clinical staff.

Digital Content Creation

Explore the world of digital creativity as you learn to craft visual masterpieces using digital tools. Let your imagination run wild and your ideas into captivating works of digital art. Audio, visual, video, and voice content instruction are all available based on the student's interest.

Youtube Content

Become a content creator and learn the ins and outs of producing engaging videos for YouTube. From scripting to editing, this class empowers you to share your voice with the world. Whether through visual storytelling or content instruction, learn the art of capturing, editing, and producing compelling videos to share with your chosen audience.

Pricing

\$240 per 4 week session

\$140 per 4 week session for WCA Families

Our Programming

Led by certified teachers, teacher assistants, and clinical staff members, activities at Whole Child Academy provide a secure learning environment that empowers kids rather than categorizing them. Our dynamic high-tech STEAM Lab forms the core of our activities, fostering hands-on engagement across our programs. While our students have found their community within our school, we are excited to welcome the broader community and expand our students' social network and social skill development. Reach out to us today to secure your child's spot!
